

# **SUPER OMNI**

---

## **METAL DETECTOR**

---

**OMNI**-directional probe detects metals metal objects from all directions equally.

Provides more than **200 hours** of normal usage (airport) with a standard 9V alkaline battery.

- Detects all metal objects, ferrous and non-ferrous.
- Detects a 9mm Pistol at a range of 12cm (4.7 in) when set at **OPTIMUM** sensitivity level.
- Detection sensitivity can be set with external control.
- Long probe optimized for rapid search and allows operator to work further away from searched persons.
- Very quick and clear response to metal objects with audible (buzzer) and visible (LED) indicators.
- No loops or sharp edges to catch on clothing.
- Very light, well balanced, easy to handle and functionally designed for convenient use.
- Buzzer sounds continuously when battery needs to be changed or recharged.
- Will not affect cardiac pacemakers or defibrillators.
- Casing made of high impact nylon and fiber-glass.
- Controls are fully protected.
- Standard 9V Alkaline battery or rechargeable.
- Weight: With battery: 400 grams (14 oz.).
- Total length: 470 mm (18.5 in.)
- Probe diameter: 25 mm (1in.)
- Probe length: 250 mm (10 in.)
- Power consumption: Min: 1.1 mA; Max: 8.3 mA; With earphone: 4.5 mA.
- Operates from -10C to + 60C (14F to 140F) at 95% humidity.
- Warranty: 2 years from date of delivery.
- Options: Earphone jack, Leather belt holster, Batteries and Charger.
